Yirro-plus®
self cleaning dental mirror system
Yirro-plus®
self cleaning dental mirror system

I am very pleased with my Yirro-plus mirror. It is a simple idea and makes working on upper teeth much faster, I can now see! The quality of the mirror surface is such that the image is brighter than with my normal front surface reflecting mirrors, and I can turn the lighting down on my loupes, thus making the battery last longer. Thank you! Robin.

**Dr. Robin Horton, Wayside Dental Practise, Harpenden, UK**

“This dental mirror is especially useful for wet preparations of any kind. In particular when locating root canals in endodontics... its extreme reflection is practical for working deep in the root canal and on severely discolored teeth.”

**Mr. Dr. Tomas Lang, microdentist in Essen, Germany**

“We have implemented the Yirro-plus System with success on root canal cleaning and on our microchirurgic pocket-treatments [glass pearl procedure]”

**Mr. Prof. Dr. Peter Kotschy, parodontologist in Wien, Austria**

More than a year ago, Yirro-plus was installed at my dentist’s chair and in no time it evolved into an indispensable part of my armamentarium. Meanwhile, my assistant can not do without it. Previously, when she was busy blowing clean my mirror during the so-called wet stage, at times my visibility and access was clogged due to the presence of the multifunction syringe. This is no longer necessary, and now an uninterrupted visibility of the surgical field is preserved. The Yirro-plus also works better than the system with rotating magnetic mirrors that I used for years. The latter system was much more expensive, caused a lot of decibels, was not hygienic, was heavy-handed and showed technical deficiencies concerning the rechargeable batteries. Yirro-plus handles are light-weight and practical, and the system is easy to install. It’s simplicity of non-moving parts is a guarantee for non-maintenance.

**Dr. Jan Berghmans, Jan Berghmans Exclusief Endodontie, Brussel, Belgium**
Yirro-plus®
self cleaning dental mirror system

* always a clear image
* extremely reflective
* more efficiency
* more comfort
* no maintenance
Yirro-plus® PREMIUM system

complete startset, automatically switched system including:

4 handles, 4 mirror heads [2x no. 0 / 2x no. 2], cleaning box, docking station, air regulation, connection supply [for air [4-6 bar] and 100-240 VAC and 24 VAC/VDC]
Yirro-plus® COMFORT system

complete startset, manually switched system including:

4 handles, 4 mirror heads [2x no. 0 / 2x no. 2], cleaning box, docking station, air regulation, connection supply for compressed air [4-6 bar & quick couplings NW 2.7/5.0]
Yirro-plus® mirror head no. 0

- mirror head 13.6 mm scratch resistant reusable front surface mirror
- housing of durable medical plastic, thermodisinfectable and autoclavable

Yirro-plus® mirror head no. 2

- mirror head 18.4 mm scratch resistant reusable front surface mirror
- housing of durable medical plastic, thermodisinfectable and autoclavable
Yirro-plus® handle

Handle

Durable medical plastic / surgical steel - thermodisinfecetable / autoclavable
To be used in combination with Yirro-plus® mirror heads no. 0 or no. 2
6-pack box

Yirro-plus® foot switch

Foot switch

For ON/OFF switching of air flow in between treatment
[back wards] compatible with Yirro-plus® PREMIUM system
Yirro-plus® cleaning box ‘8’

for protected cleaning of 8 Yirro-plus® mirror heads
stainless steel + silicone; thermodisinfectable / autoclavable
size 70 x 90 x 25 mm

Yirro-plus® sprinkler adaptor ‘4’

A 4-position sprinkler adaptor offers more economic cleaning
in thermo-disinfector
durable plastic + stainless steel - size ø30 x 12 mm
Yirro-plus® Clip-dockings

1. ø25 mm tube clip docking
2. A-dec left/right docking
3. HEKA-1 docking
4. Extension 16 mm [SIRONA Teneo]

Installation examples

A-DEC adapter docking

The regular adapter docking for A-dec integration is included in the start set.
Installation examples

A-dec
adapter docking

The adapter docking for A-dec integration is included in the start set. Also available: special A-DEC clip adapter for LEFT & RIGHT hand use. This clip adapter is not included in the start set.

Anthos
universal docking / adapter docking

The universal docking and the adapter docking are both included in start set.
The universal docking is included in the start set.

**Planmeca**
adapter ring + docking adapter [old style Compact]
special adapter for new style Compact [in development]

The adapter ring and adapter docking for Planmeca integration are included in the start set. The adapter ring fits into the older Planmeca types. We are currently working on new adapters.
If there is a spare slot, the adapter docking fits into the KaVo delivery unit.

The universal docking is included in the start set.
Sirona Teneo

PAY ATTENTION! The TNEO assistance unit has a large brim. It is necessary to use the special Docking extension 16 mm, which is separately available.

Belmont

universal docking

The universal docking is included in the start set.
Tridac [DSM spittoons]
Use Clip Docking ø25 mm

Pay attention:
The assistance unit is too rounded for placing the universal docking adapter. [1]
Best solution is to place the special Clip Docking ø25 mm on the tube. [2]

Sirona C8
universal docking

pay attention:
the moveability of the assistance may change when installing at the side of the assistance unit as indicated here.
Ultradent
universal docking, with use of the screws
The universal docking is included in the start set

Epilux
ø25 mm Clip Docking
The Clip Docking for Epilux integration is separately available.
Q-dent docking adapter

The docking adapter is suitable for Dürr block integration and is included in the start set.

Installation examples

Universal docking

Docking adapter

Both universal docking and docking adapter are included in the start set.
Installation examples

HEKA
special adapter docking
2 versions available

Topcart
universal docking
extension docking
[better manipulation of toggle]

HEKA1 CLIP

HEKA2 CLIP
[available soon]

Dürrblock
wall assist
universal docking

universal docking included in start set
FLEX coupler Assist o.e.m.
Durr-adapter for o.e.m. integration by manufacturer

FLEX coupler Sweep o.e.m.
for o.e.m. integration by manufacturer

only available through the unit manufacturer
[contact us for information]
Quick connection set

for quick connection on NW 2.7 or NW 5.0
external Air point

INCLUDED in COMFORT set

[Female connector available - on request - contact us]

do you have an external air point?
